

TREATMENT STATEMENT

Celcure AC-500

Byres of Murthly Sawmill is committed to the performance of its treated timber, fencing timbers which are permanently exposed to the weather and are out of ground contact, are designated in classes 3.2 and 4, and for ground contact class 4 with an expected life of 15-30 years.

End Users/Installers

Also have a duty of care to ensure installation is in accordance with best practice.

Re-working at the installation site should be limited to cross cutting, boring, drilling or notching. All exposed surfaces should then be given two liberal brush coats of a suitable preservative as recommended by the manufacturer of the industrial wood preservative used in the original treatment.

Other classes can be specified but must be stated at time of ordering to ensure proper penetration of treatment solution.
